

Brendyn is an enthusiastic and passionate leader, a multi-disciplinary professional with a strong conviction for probity, professional practice and organisational sustainability – assisting organisations from **purpose-to-performance**. Brendyn enjoys critical thinking and ideation, particularly when applied to problem solving, designing systems to enhance the user experience, developing people, achieving objectives and enabling assurance.

Brendyn is a Chartered Professional Engineer, certified Engineering Executive, qualified Project Manager, certified Expert Civil Infrastructure Manager, Certified Management Consultant, Certified Risk Manager, Company Director, Company Secretary, Community Director, Public Officer, certified Auditor, Skill Examiner, Trainer and Assessor, Asset Manager and Change Leader, with over 30 years industry experience – including with state government, local government, construction contractors, private consulting firms, small business, professional associations and education providers.

Since the mid 1990s Brendyn has specialised in systems engineering and assurance associated with design, construction, maintenance and asset management of public works infrastructure in NSW and beyond.

Apart from a career involving engineering, project management and business management, Brendyn has become an expert in the application of Quality, OHS/WHS and Environmental risk management in the building and construction industry in NSW with over 25 years' experience (since 1995).
