Arsalan Dehghanisariyarghan

Performance Engineer | Oracle ACE Pro | CMC | Software Eng. | Türkiye

Summary

As an Oracle DBA Team Leader, I manage complex UNIX-based Oracle databases for mission-critical applications and systems. With over 23 years of experience in database administration, I have developed expertise in high availability and performance tuning and troubleshooting, using technologies such as RAC, Dataguard, and Exadata. I am also an Oracle ACE Pro, a prestigious recognition of my contributions to the Oracle community as an author, speaker, and mentor.

My mission is to ensure the optimal performance, reliability, and security of the databases that support the business operations and goals of my Corp. and its clients. I lead a team of talented and dedicated DBAs who design, create, migrate, patch, upgrade, and support multiple node RAC databases on Exadata platforms. I also leverage my advanced SQL skills and query optimization techniques to enhance the efficiency and scalability of the database applications. Furthermore, I am passionate about sharing my knowledge and best practices with the Oracle community, and I have received multiple awards from Oracle as a Most Valued Contributor.

Experience:

Sii Poland
Senior Performance Engineer
March 2025 - Present (1 month)
Estonia

ACM, Association for Computing Machinery
Senior Member
January 2022 - Present (3 years 3 months)
EMEA

Independent Consultant

Oracle Principal Consultant | Certified Management Consultant

May 2009 - Present (15 years 11 months)

Database Build: Database Design, Creating a maximum high available database using RAC and Datagaurd.

- RAC: Install, create, and manage multiple node RAC databases
- Exadata: Exadata Supporting
- Oracle ZDLR Appliance
- Oracle Database Appliance
- Disaster Recovery
- Performance Tuning: Excellent Position on Database, Query, and Application Performance Tuning.
- Database Patching and Upgrades
- Database Migration: database Migration with near-zero downtime

IIC Corp.

Oracle DBA Team Leader

March 2012 - December 2023 (11 years 10 months)

- Database Build: Database Design, Creating a maximum high available database using RAC and Datagaurd.
- RAC: Install, create, and manage multiple node RAC databases
- Disaster Recovery
- Performance Tuning: Excellent Position on Database, Query, and Application Performance Tuning.
- Database Patching and Upgrades
